

Linux Foundation Education Benefits for Open Source Security Foundation Premier Members

Are You Leveraging Your OpenSSF Education Benefits?

All Premier members of the **Open Source Security Foundation** (OpenSSF) are entitled to education benefits as part of their membership. Whether you need an easy solution to upskill a dedicated team or are looking to test drive our full suite of courses and certifications we can help.

Don't leave these important resources on the table. Get in touch with our Education team at solutions@training.linuxfoundation.org today.

What Are My Education Benefits?*

1. Full year's access to our entire library of e-Learning courses
2. Two certification exams per seat
3. 50 seats

OpenSSF Foundation Specific Courses

In addition to our tactically focused, free **Express Learning** courses, OpenSSF offers the free e-Learning course, **Developing Secure Software**, which Premier members can host on their in-house Learning Management System (LMS) providing unlimited, complimentary access for your employees.

*Members can only utilize one set of Linux Foundation Education benefits even if your organization is a member of multiple projects. Subject to members signing the Linux Foundation standard Master Services Training Agreement.

What Does Linux Foundation Education Offer?

Linux Foundation Education offers a robust and ever-evolving **catalog** of paid **e-Learning** courses for early- mid-career and senior IT professionals along with **instructor-led** courses and 20+ professional **certifications** for every experience level.

In keeping with our mission as a promoter and enabler of open source technology, we also offer more than 95 **free e-learning** courses that are ideal for entry-level and early-career professionals.

Plus we offer:

- **Express Learning** courses, designed to onboard a specific skill in under 90 minutes
- **SkillCreds** that certify proficiency in a range of tactical skills in less than 45 minutes
- **IT Professional Programs** that provide a coordinated path of courses and certifications with personalized support to quickly launch IT professionals in new directions.

Don't leave these important benefits on the table.
